

CARROT HYBRID KXPC-020
An Early Jumbo/Cello type

This variety is a very early Jumbo/Cello type carrot. It produces very smooth roots that are 9 to 11 inches long and 1 ¾ to 2 inches in diameter. Exterior and interior color is dark orange.

KXPC-020 produces very strong and tall tops reaching 19 to 22 inches tall. The tops are dark green in color and very vigorous.

This variety has shown in the field trials good tolerance to *Alternaria dauci* and *Xanthomonas carotae*.

KXPC-020 is tolerant to premature bolting and performs well under poor growing conditions.

Markets: All US and Canadian Cello-Jumbo growing areas, especially where early maturity is required.
