

CARROT HYBRID KXPC-168
A Jumbo/Cello type carrot

KXPC-168 is an early maturing variety. It produces strong and vigorous tops 18 to 20 inches tall and dark green in color. The roots are 9 to 10 inches long and about 1 ½ to 1 ¾ inches in diameter and very smooth.

Both exterior and interior color is dark orange. Roots are durable with good flavor.

KXPC-168 has shown some tolerance to *Alternaria* and *Cercospora* in the field trials in Salinas Valley.

This carrot variety is tolerant to premature bolting. It performed well in El Centro and Salinas Valley trials

Markets: All Cello and Jumbo Markets in USA and Canada.
