

CARROT HYBRID KXPC-062
A Cut and Peel variety

This unique variety was developed for the Cut & Peel market. It produces long and very smooth roots that are 12 to 14 inches in length and about ½ inch in diameter.

The tops are dark green in color and about 17 to 19 inches tall and strong. The exterior and interior color is dark orange and the core is almost invisible.

KXPC-062 has shown some tolerance to *Alternaria dauci* and to *Cercospora carotae*.

This variety was also selected for flavor and tolerance to premature bolting.

Markets: All Cut and Peel carrot markets in US, Canada, Australia and South Africa. It can also be used in the Cut and Peel market in Europe.
