

CARROT HYBRID KXPC - 104
Cut & Peel Type

This variety was developed to produce very uniform narrow roots that are perfect for cut and peel carrots. It produces long and slender roots that are about 9 ½ to 12 inches long and about ½ to ¾ inches in diameter.

Tops are strong with good attachment and are about 17 to 19 inches in height. KXPC -104 produces roots that are very uniform in shape and size. Exterior and interior color is dark orange and has small almost indistinct core. This variety has shown sweet and mild flavor under different growing conditions. KXPC-104 is tolerant to premature bolting.

Markets: All cut and peel markets in the world.
