

CARROT HYBRID KXPC-165
An Emperor style Hybrid for Cut & Peel Market

This unique hybrid was developed for Cut & Peel Market. It produces very strong and vigorous tops that are 20 to 22 inches tall and dark green in color.

Under high population the roots are long and slender with length 11 to 12 inches and diameter $\frac{1}{2}$ to $\frac{3}{4}$ inches.

Exterior and interior color is dark orange and small core. No green shoulders in this variety. KXPC-165 produces very smooth and uniform roots.

This variety maintains good flavor under various weather conditions even after rain.

KXPC-165 has shown good tolerance to premature bolting and is also tolerant to *Alternaria dauci* and *Cercospora carotae*.

Markets: Cut & Peel markets in USA, Canada. Trials going on in Australia & S.Africa.

The seed of this variety can be produced organically.
