

CARROT HYBRID KXPC-130

A Kuroda type carrot

KXPC-130 is a Kuroda type variety. It produces very vigorous tops 20 to 22 inches tall and dark green in color.

The roots are slight to medium tapered 7 to 8 inches long and about 2 to 2 ½ inches in diameter and well filled to the tip.

Both exterior and interior color is dark orange. This variety was selected against premature bolting.

In the field trials in Salinas Valley KXPC-130 has shown good tolerance to *Alternaria dauci*.

Markets: All World Markets where Kuroda type carrot is grown.
